CONSTRUCTION EXPERTISE

Technosteel Construction L.L.C (“TSC”) was established in 1992 and within 32 years have grown steadily in the field of general contracting. Boasting its ability to construct any type of project in-house with its own civil, steel, aluminum & glazing, MEP, coating/finishing division.

TSC is one of the UAE’s leading companies in the field of construction with their reputation of being versatile contractor has been able to work in different levels of complexity with its general contracting capabilities.

TSC has in-house CNC-based steel structure fabrication facility, highly qualified project management, field erection and installation team. The activities expands with its own metal coating – galvanizing facility which can process hot dip galvanization, emergence of its own aluminum & glazing division which caters projects such as glazing facades, curtain wall system, aluminum composite panel cladding, aluminum doors & windows, stainless steel and more.
